

## LANmark-OF Splicing Accessories with Aluminium Protectors Snap-In Panel

### Description

#### Family Characteristics

- Family of patch panel accessories for termination of a cable with fusion splicing techniques.
- Provides management for cable and pigtailed within the fibre patch panel.
- The cassette protects the fusion splices and holds them in position.
- The splice cassette can retain up to 24 fusion splices.
- Four trays can be stacked inside the patch panels resulting in a maximum capacity of 96 fusion splices in a patch panel.
- Splicing with Aluminium protectors can be used for loose tube cables, i.e. fibres with a 250 um coating. Aluminium protectors can not be used with tight buffer cables, i.e. fibres with a 900 um coating.
- Splicing with Aluminium protectors can be used for maxistrap pigtailed.
- LANmark-OF Bend Limiting Tube (N890.145) can be used to split up fibres of loose tube cable into different splice cassettes.
- These splice cassettes can be installed in the LANmark-OF Snap-In Patch Panel (N441.203 and N441.204) and the LANmark-OF Zone Distribution Box (N521.630).
